## Experience

### Quality Assurance Automation Engineer

Klika Tech, Inc

Oct 2019 - Jul 2021 (1 year 10 months)

As a member of the Backend Testing Team, I developed automated tests in Python and Groovy.
During the process of refactoring and optimizing the Python Test Framework, I successfully reduced the test run time by half.

### Big Data Quality Assurance Engineer

EPAM Systems

May 2018 - Oct 2019 (1 year 6 months)

As the Tech Lead of the Production Support Team, my responsibilities included investigating complex issues using Hive (SQL) and sharing insights and experiences with the team.
I also successfully undertook two business trips to our customer's location in the US. During these trips, I shared knowledge on optimizing Hive queries and effectively resolving production issues.

### Software Test Automation Engineer

EPAM Systems

Mar 2017 - Apr 2018 (1 year 2 months)

Smart json/xml comparator for our Test Framework was developed by me.

## Education

### Belarusian State Economic University

Bachelor's degree, International Economic Relations

2007 - 2012

## Licenses & Certifications

### Specialization Data Engineering, Big Data, and Machine Learning on GCP - Coursera

XK2WSLFLMDFS

## Skills

Test Automation • Quality Assurance • Python (Programming Language) • SQL • Git • Linux • Google Cloud Platform (GCP) • Web Services
